

AMAN KUMAR YADAV

Mau, Uttar Pradesh

+91-9140903743 yadavamanmau@gmail.com Portfolio LinkedIn GitHub LeetCode Codeforces

Education

Vellore Institute of Technology, Bhopal

2023 – 2027

B.Tech in Computer Science and Engineering — CGPA: 8.2

Kothri Kalan, Madhya Pradesh

Sunbeam School

2020 – 2021

Class XII — Percentage: 78%

Mau, Uttar Pradesh

Technical Experience

Full-Stack & Generative AI Developer

Feb 2025 – Present

Independent Projects

- Engineered 3+ scalable full-stack web applications on the MERN stack (React.js, Node.js, Express.js, MongoDB).
- Automated content-generation workflows with LLMs and the Gemini API, cutting turnaround time by 40% through targeted prompt design.
- Combined LangChain, RAG, and vector embeddings to sharpen contextual accuracy and retrieval precision across AI models.

Projects

AI-Powered Real-Time Chat Application with RAG & Agentic AI

Apr 2026 – Present

- Engineered a MERN real-time chat platform with Socket.IO, MongoDB Atlas, and JWT authentication for instant 1-on-1 messaging and live presence.
- Integrated Google Gemini, RAG, and vector embeddings for conversation memory, Document Q&A, and semantic search across authorized chat history and PDF/TXT files.
- Added an AI Agent with 5 read-only tools, AI Copilot, Smart Replies, and automated chat summarization.

MediAura – AI Medical Chatbot (Gemini, LangChain, Pinecone, Flask)

Jul 2026

- Built a Flask-based medical chatbot powered by Google Gemini and RAG, retrieving grounded answers from a medical knowledge base.
- Enabled semantic search with a Pinecone vector database and HuggingFace embeddings; shipped to production on Render via Gunicorn.

AI SaaS Platform (PERN Stack)

Jan 2026 – Present

- Architected a subscription-based AI SaaS platform on the PERN stack with Clerk handling secure authentication.
- Designed 5+ AI-driven tools, prompting LLMs through the Gemini API for task-specific outputs.
- Exposed 15+ REST API endpoints with integrated billing, built for production-grade reliability.

FinLedger – Banking Backend System (Node.js, MongoDB)

May 2026 – Jun 2026

- Secured a banking backend with JWT-based authentication and automated transaction handling.
- Implemented a double-entry ledger guaranteeing 100% balance integrity through atomic operations.

Technical Skills

Languages: Java, Python, JavaScript, SQL, HTML, CSS

Frontend: React.js, Bootstrap

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, PostgreSQL (Neon), MySQL, Pinecone

Generative AI: LLMs, Prompt Engineering, Google Gemini API, LangChain, RAG, HuggingFace Embeddings

Tools: Git, GitHub, VS Code, AWS, Figma, Canva

Certifications

OracleCloudInfrastructure(OCI)CertifiedGenerativeAIProfessional

Sep 2025

GenAI – PoweredDataAnalyticsSimulation|TATAForage

July 2025

IntrotoArtificialIntelligence|InfosysSpringboard

June 2025

CSS, Bootstrap, JS, andPHPStack|Udemy

April 2025

Extracurricular

- Solved 150+ DSA problems on LeetCode and Codeforces in Java, sharpening algorithmic problem-solving and competitive-programming skills.
